

COLD-WIRE[®]

technology

Adds another critical security element to protect your weapons from theft
Available for all electronic **BLAC-RAC[®]** models

FEATURES AND BENEFITS

- Prevents hot-wiring of the electronic lock if an external power source is applied to power wires
- Compatible with a siren control box or momentary switch
- Undetectable inside vehicle, cannot be “skimmed” with EMF detection
- Field upgradeable for all **BLAC-RAC[®]** electronic models currently in service
- Compatible ONLY with **BLAC-RAC[®]** weapon retention systems
- Small size makes device easy to conceal in hard to reach areas
- Each **COLD-WIRE[®]** device can secure one or two **BLAC-RAC[®]** weapon retention systems
- Proprietary and patented technology

SPECIFICATIONS

DIMENSIONS	1.5" X 2.5" X .75"
SWITCH TYPE	MOM [NORMALLY-CLOSED]
VOLTAGE @ AMPS	9.0 - 15.6 VDC @ 20 A MAX - SAE J994
WATER-RESISTANT	SEALED W/EPOXY RESIN

COLD-WIRE[®] DEVICE

Connect to Vehicle Siren Box
or Momentary Switch [Normally-Closed]
12 Volts DC

To **BLAC-RAC[®]**
weapon system wires
